

Memorandum

To: Joseph Martella, Rhode Island Department of Environmental Management (RIDEM)
From: Michele V. Leone, Manager, New England Site Investigation & Remediation
Date: 09/02/2011
Subject: Upcoming Site Response Action Report – Week of September 5, 2011
Former Tidewater Facility
Pawtucket, Rhode Island
RIDEM Case No. 95-022

As requested by RIDEM, the following summarizes response actions expected to be performed at the above-referenced site during the week of September 5, 2011.

SITE ACTIVITIES TO BE PERFORMED

- Complete site observation walk;
- Continue shallow excavations within the natural gas regulator station area associated with gas upgrades. Complete limited removal of polychlorinated biphenyl (PCB) impacted soil and concrete within the fenced regulator station as part of this work. Areas of limited removals will be restored following completion;
- Continue trenching associated with undergrounding the overhead gas line near the regulator station; and
- Continue air monitoring during excavation activities in accordance with the April 2011 Air Quality Monitoring Program (AQMP).

During and subsequent to the completion of the excavation work, certain above-ground activities (i.e., no excavation work) associated with the regulator station upgrades will be performed at the site.
