 Located Near the Former Tidewater Facility in Pawtucket, RI  
 Air Quality Monitoring - Transient Observations**

Date	Time	Location	Constituent	Observed Range of Elevated Transient Readings	Observed Conditions that may be leading to elevated transient readings
1/9/2013	7:28	FS1	TVOCs	0.20 ppm	The reading was not sustained. The source was unknown. The neighboring property was moving some trash material around proximate to the meter. The contractor was hand digging the conduit trenches within the substation and placing crushed stone within the substation yard. The next two readings were 0.081 and 0.023 ppm.

Transient readings were conducted over a three minute time period. A reading is sustained if it is held for over a five minute time period.
